RE: Modification to Bonanza
Operations, Pride of the West
Vein
ACT/047/010
Uintah County, Utah

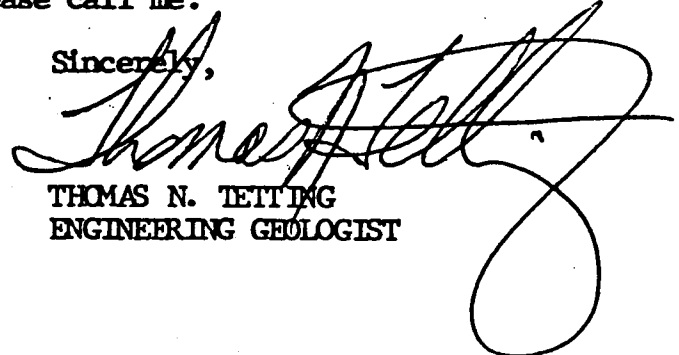

Dear Leroy:

Thank you for meeting with the Division staff in Vernal on Friday, June 17th. It was a pleasure to review some of your proposals for organization of the Bonanza Mining and Reclamation Plan. I might add that the Division's understanding of the current (May 23, 1983) mining modification to the Pride of the West vein is one of agreement; whereby it will be more conveniently incorporated into the overall mining plan. We realize that progress is being made on the development of the plan and are secure in our knowledge that you are providing direction to the project modification in accordance with the Utah Mined Land Reclamation Act of 1975, U.C.A. 1953.

The Division has also observed an area of the Bonanza Operation with which familiarity has been lacking. While inspecting oil shale minesites east of Bonanza on June 16, 1983, large clouds of black material were seen sporadically in the neighborhood of American Gilsonite's property, east of the highway. Upon closer observation it was detected that wind whips up stockpiled gilsonite. While grateful that no fire was actually producing the black clouds, it does not seem that this situation is adequately under control and certainly not in keeping with Objectives, title 40-8-12 of the Act. I trust that you may already be aware that the Division requires a mitigation measure to be enacted for these Solar Pad areas. Your proposals would best be incorporated into the overall Mining and Reclamation Plan.

If you have any further questions please call me.

Sincerely,

THOMAS N. TETTING
ENGINEERING GEOLOGIST
